

GAS DIRECT VENT FIREPLACES

QUADRA-FIRE

PURE PERFORMANCE

RADIATE WARMTH AND BEAUTY

Heat multiple rooms with the ambiance of a traditional wood fire.

The Quadra-Fire Gas Fireplace provides more than classic fire ambiance - these powerful and efficient heater-rated gas fireplaces are built for everyday use, and can even be used during power outages. Sophisticated controls let you determine the level of warmth across multiple rooms, heating up to 2,000 square feet. The glowing coal bed and realistic logs create true fireside charm, and an array of durable fronts in a variety of finishes lets you match any décor.

GAS DIRECT VENT FIREPLACES

Shown with Tuscan Bar front in sienna bronze with antique copper accents

EXPRESSION 36

The Expression 36 gives you the ability to heat up to 2,000 square feet. Its patented FireBrick® interior heightens efficiency, resists rust and corrosion, and eliminates the noise associated with many metal fireplaces. Enjoy a 36" viewing area and attractive accent lighting that enhances the wood fire beauty.

Make it your own by choosing one of our designer fronts and finishes.

Shown with Remington Avenue front in black

QV36A

The qv36a gas fireplace offers control, performance, and the ability to reliably heat multiple rooms - up to 1,600 square feet. Its innovative safety pilot system and sealed combustion design improve efficiency, while the attractive herringbone interior reflects heat, and provides a classic masonry feel.

Customize the qv36a with a stunning array of durable fronts in a variety of finishes providing the perfect accent to any room.

Shown with Remington Avenue front in vintage copper

QV32A

With a 32" viewing area, the qv32a is ideal for smaller spaces, but it provides all the wood fire ambiance of the 36" version and plenty of heating power: up to 1,500 square feet. A heat-reflecting herringbone brick interior and durable fire grate help create a true hearthside look and feel.

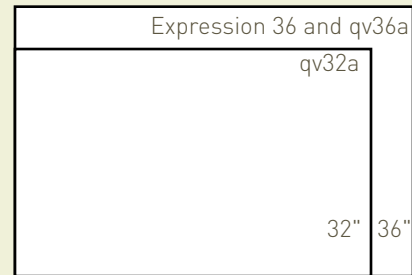

All front options are available in a range of finishes to complement any home décor.

DESIGN YOUR FIREPLACE IN THREE EASY STEPS

- 1) Determine your width
- 2) Choose your model
- 3) Choose your front

STEP 1 DETERMINE YOUR WIDTH

Choose from two widths—32" and 36". The right size for the wall and room is important. A fireplace that is too small looks disproportionate. A fireplace that's too large can overheat the room. Your salesperson can help you determine the best fit.

STEP 2 CHOOSE YOUR MODEL

Each of Quadra-Fire's gas fireplaces offers unique features.

EXPRESSION 36

Shown with Mission Hill front in vintage copper

FEATURES

- FireBrick technology
- IntelliFire™ wall control
- Flame enhancing lights
- Decorative andirons and fire grate

qv36a	NG	20,500 – 30,000	up to 1,600 sq. ft.	4" x 6-5/8"	5" x 8"
	LP	15,800 – 28,000			
qv32a	NG	17,000 – 28,000	up to 1,500 sq. ft.	4" x 6-5/8"	5" x 8"
	LP	15,000 – 26,300			

Heating capacity (in square feet) is a guideline only and may differ slightly due to climate, building construction and condition, amount and quality of insulation, location of the heater, and air movement in the room. BTUs will vary depending on the type of fuel used.

GAS EFFICIENCIES

Steady State - Since most homeowners use their appliance for an extended time while they are in the room, Steady State measures how efficiently your appliance converts fuel to heat once it is warmed up and running in a "steady state".

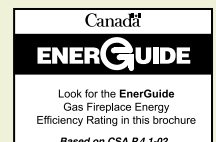

AFUE - AFUE rating is more typically used with appliances, like your furnace, that continually cycle on and off to maintain a constant temperature.

EnerGuide (CSA P.4.1-02) - EnerGuide is a rating used in Canada to measure annual efficiency.

FIREPLACE	U. S. EFFICIENCIES				CANADA ENERGUIDE	
	Steady State		AFUE		CSA P.4.1-02	
	NG	LP	NG	LP	NG	LP
